DETAILED ACTION

Allowable Subject Matter

Claims 57-75 and 78-96 are allowed.

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

Regarding claim 57, Ku (5,856,237), Visokay et al. (6,211,034) and Igarashi (6,107,656) appear to be the closest prior art reference. Ku, Visokay et al. and Igarashi teach substantially the entire claimed structure, as recited in claim 57, except a conductive diffusion barrier layer comprising WxNy and TiWxNy, and a conductive diffusion barrier layer comprising TiOxNy and TiWxNy.

Regarding claim 62, Pfister (4,997,785), Wu (5,710,454), Hachiya (5,244,835) and Dennison (5,637,525), appear to be the closest prior art reference. Pfister, Wu, Hachiya and Dennison teach substantially the entire claimed structure, as recited in claim 62, except enabling an artisan to modify the Pfister device in its common cross section without extending the contact structure through its channel region.

Therefore, prior art do not teach or render obviousness the semiconductor structure, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
